

JOB OFFER

POSTDOC FELLOW

One year (renewable), full time

The experimental medicine unit at the de Duve Institute in Brussels, Belgium, seeks to appoint a motivated post-doctoral fellow. The successful candidate will join the research group of Professor Jean-Baptiste Demoulin and will work on PDGF receptor mutations in human diseases.

If you hold a PhD in biomedical sciences (or an equivalent degree), with good publications in the field, and have a strong interest for signaling and genetics, please consider applying.

Your qualifications and skills

- Experience in molecular and cellular biology techniques is required.
- Experience in omics data analysis is desirable (proteomics and/or RNA-seq, training available).
- Ability to work in a team.
- Excellent written and oral communication skills.

What we offer

Full time one-year contract (renewable) with an attractive package. The position is available immediately and will remain open until filled. We value equality, diversity and an open, collaborative and welcoming work environment.

Contact

Please send your CV (including contact information of at least two references) and motivation letter to Prof. Jean-Baptiste Demoulin at jean-baptiste.demoulin@uclouvain.be.
